ABOUT

SRE / Cloud professional with 4+ years of experience in DevOps, Kubernetes and infrastructure automation. Works across AWS platforms, GitOps and developer tooling, with hands-on experience in observability, cloud security and incident response in client environments. AWS Certified Security – Specialty and Solutions Architect – Associate.

PROFESSIONAL EXPERIENCE

Site Reliability Engineer (SRE) | Cloud Engineer — Opsteam

Aug 2025 – Present

- Migrated self-hosted GitLab and its CI runners to Amazon EKS, including controlled upgrades, S3 integration and post-migration validation of 131 projects and CI/CD pipelines.
- Upgraded 13 Kubernetes clusters across development, staging, production and shared services, including Karpenter and node pool updates.
- Implemented AWS platform foundations with Terraform and EKS, including shared services, private connectivity and environment isolation.
- Built reusable Terraform modules, Helm charts and Backstage templates, with GitOps and CI/CD workflows using Argo CD, GitHub Actions and GitLab CI.
- Centralized logs from 2 AWS regions in Loki on EKS, integrating CloudWatch/Kinesis and ECS FireLens; migrated Grafana dashboards and tuned alerts.
- Strengthened least-privilege IAM controls, federated access and CI/CD authentication with OIDC. Investigated and contained incidents through log analysis, resource isolation and evidence preservation.
- Built internal tools for tenant isolation, access governance and AI-assisted pull request review; validated JIT access and WebAuthn pilots in development.
- Delivered efficiency improvements with gp3 EBS volumes and removal of unused infrastructure; produced architecture and cost assessments.

Senior DevOps Analyst — Vertigo Tecnologia

Jun 2025 – Aug 2025

- Led the technical delivery of a cloud-native platform foundation, from architecture to implementation, with reusable infrastructure-as-code templates and Argo CD.
- Integrated Keycloak and Backstage and implemented centralized observability across Kubernetes clusters on AWS and Oracle Cloud.

Mid-level DevOps Analyst — Vertigo Tecnologia

Sep 2024 – Jul 2025

- Built infrastructure automation and CI/CD pipelines for clients, plus templates, plugins and customizations for the internal VeeCode platform.
- Implemented observability solutions and AI-powered tools for operational workflows, while working in DevOps consulting.

Junior DevOps Analyst — Vertigo Tecnologia

Oct 2022 – Sep 2024

- Implemented monitoring with Grafana, Prometheus, Loki and Alertmanager, routing alerts to Microsoft Teams.
- Built Terraform automation, Helm charts, Dockerfiles and Bamboo / Shell pipelines for Node.js applications.
- Administered HashiCorp Vault, Consul, Redis and RabbitMQ and implemented least-privilege controls on AWS.

DevOps Intern — Vertigo Tecnologia

Feb 2022 – Oct 2022

- Automated the migration of 200+ repositories from GitLab.com to self-hosted GitLab in about an hour, using Python and the GitLab API.
- Deployed GitLab on DigitalOcean Kubernetes with Helm, customized deployment templates, built CI/CD pipelines and containerized applications.

SKILLS

Cloud and infrastructure: AWS (EKS, ECS, EC2, VPC, S3, RDS, KMS), Oracle Cloud, DigitalOcean

Containers and IaC: Kubernetes, Docker, Terraform, Helm, Karpenter

Delivery and platforms: CI/CD, GitOps, Argo CD, GitHub Actions, GitLab CI, Backstage

Observability: Grafana, Prometheus, Loki, VictoriaMetrics, CloudWatch, Alertmanager

Security: IAM, OIDC, SSO, Keycloak, HashiCorp Vault, Network segmentation, Incident response

Automation: Python, Go (Golang), Bash / Shell, Linux

EDUCATION

Bachelor in Information Systems — Universidade Estácio de Sá
